Order from SLA mi$2.70, ph$4.80 61-10150

Trans. of R.v[ista del] Combustibili (Italy) 1954, v. 8, [no. 7/8] p. 526-544.

A thermal differential analysis showed that normal paraffin waxes with a lower molecular weight can give rise to two transition phenomena, while those of higher molecular weight show only one, and that the value of the transition phenomenon is influenced by the speed of cooling of the sample. Iso-paraffin waxes show transformation phenomena at the solid state in a manner analogous to normal paraffin waxes (See also 61-10153)
